

KeContact Charging Solutions & Accessories

# Product Overview 2022/23 – International

**KEBA**<sup>®</sup>

Automation by innovation.

KEBA, headquartered in Linz/Austria, is an internationally active, privately owned technology company that has been providing innovative automation solutions for the industrial, banking and service sectors since 1968. Since 2009, we have been applying our know-how to the development and production of holistic charging solutions for electromobility. Our KeContact P30 wallbox series enable simple, safe and reliable charging of hybrid and electric vehicles.

At KEBA Energy Automation, we attach great importance to sustainability: Our production in Linz and the use of predominantly European components ensure short transport routes. This saves CO<sub>2</sub>.

Already during the conception of our charging solutions, we pay attention to the recyclability of materials, the energy efficiency of the production as well as the longevity of the products. For the changeover to a purely CO<sub>2</sub>-neutral product range, we have gone one step further.

Following the principle of 'cradle-to-customer plus waste' – i.e. from the extraction of raw materials to production and disposal – we surveyed the carbon footprint of our wallboxes with the support of ClimatePartner.

Once we knew this value, we were able to take measures to reduce or avoid greenhouse gas emissions or, if necessary, to compensate for them by investing in selected and certified climate protection projects.

The result is a climate-neutral wallbox range that combines everything our customers want.

You can find information on the climate protection projects we support here:

## Climate-neutral refuelling

# KeContact P30 charging stations

### For safe and reliable charging, networking and control

Thanks to compliance with the latest communication standards and a wide array of functions, carbon-neutral KeContact P30 charging stations cover all scenarios for AC (alternating current) charging of fully electric cars and plug-in hybrids, making them the right, sustainable choice every time – whether for private or commercial use.

With its extensive product portfolio, KEBA has the right charging solution for every application. Manufactured in Austria, the robust KeContact charging stations have proved their reliability a hundred-thousand times over extensive periods of operation and stand for reliable, safe charging – so that your electric vehicle is always ready when you need it.

## // Charging solutions

### Home charging

Easy and reliable charging of all common vehicle models in parking lots of single- and multi-party buildings with the option of:

- // Simple user authorization with RFID cards
- // Integration into smart home applications
- // Integration into photovoltaic systems (surplus charging)
- // Integration into billing systems for company cars

### Fleet charging

Future-proof charging infrastructure for your fleet with the option of charging and load management:

- // Local load management for regulated charging power distribution
- // Charging for employees and guests
- // Interfaces for monitoring and billing
- // Billing conformity (MID certified)

### Charging for guests & customers

Offer the additional service of charging at your location thanks to:

- // Simple user authorization with RFID cards
- // Local load management for optimal distribution of the available energy
- // Exact recording of individual charging sessions

## KeContact P30 a-series

The a-series is the entry level for easy and safe charging with a single wallbox.

All models are capable of 1- and 3-phase charging and have an LED status bar indicator.

// Charging solutions

## a-series Wallboxes with type 2 socket

All wallboxes have

- // Type 2 charging socket
- // White design cover
- // LED bar for charging status
- // Single and three-phase operation
- // Enable input / switching output
- // DC-leakage detection
- // USB connection for firmware updates
- // RJ45 Ethernet connection for firmware updates and debugging

Product description	Charging current [A] adjustable	Maximum charging power	Energy meter	MID-certified	WLAN	LTE/4G	RFID	Item number

// Charging solutions

## a-series Wallboxes with type 2 cable

- All wallboxes have
- // 6 m type 2 cable
  - // Cable holder
  - // White design cover
  - // LED bar for charging status
  - // Single and three-phase operation
  - // Enable input / switching output
  - // DC-leakage detection
  - // USB connection for firmware updates
  - // RJ45 Ethernet connection for firmware updates and debugging

## KeContact P30 c-series

The connective c-series with a certified energy meter can be integrated into the smart home or a photovoltaic system using an energy management system thanks to its standard communication interfaces.

// Charging solutions

## c-series Wallboxes with type 2 socket

All wallboxes have

- // Type 2 charging socket
- // White design cover
- // LED bar for charging status
- // Single and three-phase operation
- // Freely programmable display
- // Enable input / switching output
- // DC-leakage detection

- // USB connection for firmware updates
- // RJ45 Ethernet connection for firmware updates and debugging
- // Ethernet connection LSA+ for a permanent network connection to an x-series or other systems
- // UDP interface and Modbus TCP (passive) for integration in smart home and PV systems (via external controller)
- // Communication for OCPP and load management as client
- // KEBA eMobility App to control and manage the wallbox

## KeContact P30 x-series

Smart e-mobility solutions can be optimally implemented using the x-series. The versatile device enables intelligent control of multiple charging points, including dynamic load management.

One x-series wallbox can control up to 15 c-series devices. The corresponding web interface allows central configuration and the viewing of individual charge sessions. All x-series models feature a WLAN communication interface as a standard.

// Charging solutions

## x-series Wallboxes with type 2 socket

All wallboxes have

- // Type 2 charging socket
- // White design cover
- // LED bar for charging status
- // Single and three-phase operation
- // Freely programmable display
- // Enable input / switching output
- // DC-leakage detection
- // USB connection for firmware updates and configuration
- // RJ45 Ethernet connection for firmware updates and debugging

- // Ethernet connection LSA+ for a permanent connection to backend or smart home servers or other KeContact P30 wallboxes
- // UDP interface and Modbus TCP (passive) for integration in smart home and PV systems (via external controller)
- // Modbus TCP (active) communication with the external energy counter for charging current regulation and house connection monitoring
- // OCPP, communication for load management and backend connection as master or stand-alone
- // KEBA eMobility App to control and manage the wallbox

A photograph showing a row of white charging stations. Several cables of different colors (black, orange, blue, yellow) are plugged into the stations. The background is slightly blurred, showing more of the same stations. A large green triangle is positioned in the bottom right corner of the image.

Manage & control  
charging

// Manage & control charging

## KeContact M20 Charging Management Controller

KeContact M20 – the central control unit for the convenient control of a large, local charging network of KeContact wallboxes. Organise multiple charging stations easily and optimise the use of available power.

- // Central configuration via web interface
  - // Create up to 15 charging station clusters that can be freely configured as a unit
  - // Static and dynamic load management
  - // Option for symmetrical and phase-correct charging to avoid unbalanced loads
  - // Log all charging sessions for up to 3 months (stored locally)
- 
- // Dimensions: 33 mm x 80 mm x 121.2 mm; weight 750 g
  - // SIM card format: 4FF Nano
  - // Scope of delivery: Top-hat rail for mounting in the control cabinet, 230 V power supply unit, external LTE antenna (cable length 2 m), screwdriver

## eMobility Solution for hotels & companies

KEBA offers hotels, companies and all those who want to provide their customers a comfortable charging infrastructure an easy-to-use and affordable solution.

Charging sessions of guests, employees or customers can be easily tracked and reported for further invoicing.

This stand-alone desktop application gives an overview of the charged energy of your charging infrastructure that can be directly attributed to single charging sessions and electric vehicle drivers via RFID cards.

The administration effort can be reduced to a few clicks. What you get is a report of the total charged energy as well as the costs that can be directly attached to the hotel bill or payroll.

- // Integration of new or existing KeContact P30 c- and x-series with RFID-function
- // Generation of user specific reports on charged energy, charging processes, charging duration and costs based on the kWh price
- // Simple RFID card management and customized attribution for users
- // Charging sessions can be started at any integrated charging station via RFID card
- // Integration of up to 16 KeContact P30 into the charging infrastructure
- // One-time license costs (no running costs)
- // Scope of delivery: licence key, 10 RFID cards

**Item no. 126 795**

# Accessories & spare parts

**Suitable for KEBA charging stations**

KeContact P30 accessories

Everything you need for your wallbox

A selection of accessories is available for KeContact charging stations.  
From the robust stainless steel pedestal to the standard-compliant sticker set.

// Accessories

### KC-P30 pedestal, single – stainless steel

- // Stand for mounting one KeContact wallbox
- // Suitable for indoor and outdoor use
- // Material: Stainless steel 1.4301
- // Surface: Polished K220
- // Including assembly material

**Item no. 89 735**

### KC-P30 pedestal, double – stainless steel

- // Stand for mounting two KeContact wallboxes
- // Suitable for indoor and outdoor use
- // Material: Stainless steel 1.4301
- // Surface: Polished K220
- // Including assembly material

**Item no. 90 786**

### KC-P30 pedestal, triangle – stainless steel

- // Stand for mounting two KeContact wallboxes
- // Suitable for indoor and outdoor use
- // Material: Stainless steel 1.4301
- // Surface: Polished K220
- // Including assembly material

**Item no. 99 839**

### Indoor base plate – stainless steel

- // Stainless-steel base plate for assembling stands without a foundation
- // For indoor use for exhibition purposes
- // Dimensions: 800 x 800 mm
- // Material: Stainless steel 1.4301
- // Surface: Polished K220

**Item no. 86 350**

// Accessories

## Acrylic glass pedestal for wallbox mockup

- // Acrylic glass stand for mounting one KeContact P30 model
- // For indoor use for exhibition purposes

**Item no. 110 880**

## Charging cable type 2 green

- // Charging cable type 2 11kW or 22kW each in 6m length
- // Suitable for all KeContact P30 with socket
- // Plug ergonomically shaped, robust and with protective caps
- // Climate neutral

### **Article no. 124 084**

Charging cable type 2 6m 11kW - GREEN EDITION

### **Article No. 124 086**

Charging cable type 2 6m 22kW - GREEN EDITION

// Accessories

## Charging station dummies

### KeContact wallbox mockup, type 2 socket, grey

- // Grey wallbox dummy without technical function for exhibition purposes
- // With symbol image below the socket cover

**Item no. 98 326**

### KeContact wallbox mockup, type 2 socket, white

- // White wallbox dummy without technical function for exhibition purposes
- // With symbol image below the socket cover

**Item no. 111 642**

### KeContact wallbox mockup, type 2 socket, black

- // Black wallbox dummy without technical function for exhibition purposes
- // With symbol image below the socket cover

**Item no. 111 641**

### KeContact wallbox mockup, type 2 cable, grey

- // Grey wallbox dummy with cable and holder without technical function for exhibition purposes
- // Charging cable can be plugged into a vehicle for demonstration purposes

**Item no. 107 661**

// Accessories

## RFID cards

// in KEBA design  
// 10 per package

**Item no. 96 089**

## Sticker sets for charging stations

### EN17186 sticker set for EU cable

// According to the requirement in the EU  
// Consisting of two stickers with the dimensions  
50 x 45 mm and 25 x 120 mm (to be applied  
on the charging cable)  
// 50 sets per package

**Item no. 120 491**

### EN17186 sticker for EU socket

// According to the requirement in the EU  
// Dimensions: 50 x 45 mm  
// 50 pcs per package

**Item no. 120 490**

**Suitable for KEBA charging stations**

KeContact P30 spare parts

**Spare parts for all your needs**

Did you lose a screw? Do you need a new design cover? No problem! We have the right replacement to fix (almost) any little problem with our KeContact charging stations. This applies to assembly material, packaging, cover parts and spare parts alike.

// Spare parts

## Design cover GREEN EDITION

// Wallbox front cover in white  
with GREEN EDITION lettering  
// Colours: Front RAL 9010 /  
Side parts RAL 7016

**Item no. 120 623**

## Design cover, grey

// Wallbox front cover in grey  
// Colours: Front RAL 7004 /  
Side parts RAL 7016

**Item no. 108 352**

## Design cover, a-series

// Wallbox front cover in white  
// Colours: Front RAL 9010 /  
Side parts RAL 7016  
// No "GREEN EDITION" imprint

**Item no. 120 622**

## Design cover, white

// Wallbox front cover in white  
// Colours: Front: RAL 9010  
Side parts RAL 7016

**Item no. 108 354**

## Design cover, black

// Wallbox front cover in black  
// Colours: Front: RAL 9005 /  
Side parts RAL 9005

**Item no. 107 544**

// Spare parts

## Packaging set for P30 cable types

- 12 sets, one set consisting of:
  - // Outer packaging
  - // Inner packaging
  - // Drilling template
  - // Instruction manual
  - // Assembly material
  - // Cable holder
  - // Cardboard divider (wallbox – cable)
  - // Packed on a EURO pallet,
- Dimensions:  
1200 x 800 x 1250 mm

**Item no. 124 170**

## Packaging set for P30 socket types

- 12 sets, one set consisting of:
  - // Outer packaging
  - // Inner packaging
  - // Drilling template
  - // Instruction manual
  - // Assembly material
  - // Packed on a EURO pallet
- Dimensions:  
1200 x 800 x 1250 mm

**Item no. 124 173**

## Terminal cover set

- // Suitable for all KeContact P30 charging stations
- // Set consisting of 10 covers
- // including fastening screws (20 pcs)
- // Dimensions: 250 x 180 x 170 mm

**Item no. 124 305**

## Connection panel cover set

- // Suitable for all KeContact P30 charging stations
- // Set consisting of 10 covers
- // including fastening screws (40 pcs)
- // Dimensions: 310 x 220 x 320 mm

**Item no. 124 307**

// Spare parts

## Charging cable holder

- // suitable for all KeContact P30 charging stations
- // Including fastening screws and screw covers
- // Dimensions: Width 102 mm, height 164 mm, depth 131 mm
- // Colour: RAL 7016

**Item no. 90 234**

## Spare screws for design cover

- // For fastening the design cover
- // Suitable for all KeContact P30 charging stations
- // 10 pcs

**Item no. 106 428**

## Retaining spring for connector parking bay

- // 10 pcs

**Item no. 106 430**

## Spare screws for connection panel

- // For fastening the connection panel
- // Suitable for all KeContact P30 charging stations
- // 40 pcs

**Item no. 126 477**

// Parti di ricambio

## Sealing caps set

- // Sealing caps for terminal cover and connection panel cover
- // For sealing purposes
- // 100 pcs

**Item no. 109 056**

## Installation kit for KeContact P30

Assembly material kit supplied as standard with KeContact charging stations.

The kit contains:

- // Fastening material for assembling the charging station on the wall
- // Cable glands including seal and sealing caps

**Item no. 89 986**

**Made in Austria.**

All charging stations from KEBA  
are manufactured in Austria.
